

Trapped in a Wildfire? Fire moves fast! Up to 20 mph uphill. Head for a firebreak - an area where the fire's fuel is low. Lay on the ground or, if you're trapped in a car, seal the vents and windows and lay on the floor. Cover your mouth with a wet cloth or dirt.

CDD Definition:
A habitat or environmental invasion by a dramatic spread of an organism (plant or animal) that may cause problems or damages.

ANIMAL INFESTATION

When a storm surge is pushed onto shore by a hurricane, it moves with the force and speed of the hurricane - 10 - 15 mph. This is equivalent to being in heavy rapids.

How to Survive a Tornado:
Indoors? Head to the lowest floor and stay away from doors and windows.
Outside? Get out of your car! Find flat ground or, better yet, a ditch in open ground away from things that can be flung about. Lie down as flat as you can. Good luck!

TORNADO

A violent, rapidly rotating column of air that extends downwards from the base of a cumulonimbus cloud

coastal area flooding.

STORM SURGE

A deviation (either positive or negative) in the height of the sea surface from normal tidal levels. Triggered by wind stress and low atmospheric pressure. Often associated with tropical cyclones. Positive storm surges often cause coastal area flooding.

A destructive wave, often many meters high, produced by a violent vertical motion of the sea floor

TSUNAMI

HURRICANE

Cyclonic storms (large-scale atmospheric circulation patterns in Atlantic, Caribbean or eastern Pacific (Hurricane) and western North Pacific (Typhoon)) which produce high, often damaging winds, heavy rain and flooding.

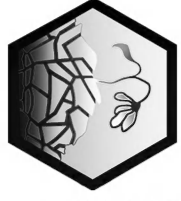

FLOOD

CDD Definition:
Floods result when natural drainage channels, or human-made facilities, cannot convey all the water supplied to them; excess water spills over the banks and inundates the surroundings.

WILDFIRE

CDD Definition:
A naturally triggered fire which affects forested or grassland regions.

DROUGHT

Canadian Disaster Database (CDD) Definition:
A prolonged period of abnormally dry weather that depletes water resources.

4 COMPANIES BEHIND 10% of ALL carbon emissions

In 2019, Chevron Corporation's revenue totaled **139.87 billion U.S. dollars**.

In January 2019, BP discovered **1 billion barrels of oil** at its Thunder Horse location in the Gulf of Mexico.

Shell has spilled **1.5 million tons of oil** over the last 50 years. That's one Exxon Valdez sized spill every year.

Between 1998 and 2004, ExxonMobil granted \$16 million to advocacy organizations which disputed the impact of global warming.

Walk. Bike. Take public transportation.

Choose an energy efficient car.

Park instead of idling at the drive through.

Take the train instead of flying.

Buy local products to reduce transport.

YOU CAN MAKE CHANGES

Choose a green career.

Buy compact fluorescent lights. They use **25%** of the electricity and last **10X** longer than incandescent bulbs.

Unplug electricity vampires (any gadget you plug in or charge).

Email your MPs and local businesses.

The Extinction Symbol was created by Goldfrog ESP.

The circle is Earth.
The hourglass is the warning.
FIGHT FOR LIFE ON EARTH
